

CX-395

Built for the Bigger Fight

The CUDA CX-395 brings full-frame optics to sub compact frames. With an RMSc footprint, larger lens window, and the same elite-grade reliability CUDA is known for, it's made for shooters who want maximum visibility, faster sight picture, and rugged dependability even in the smallest of footprints.

Key Features and Innovations

Instant-On Motion Activation

The CX-395 is always ready to respond. Its built-in motion sensor activates the optic the moment movement is detected—no buttons, no delay. It automatically powers down to preserve battery, yet springs back to life instantly when you need it.

Expanded Viewing. Faster Acquisition.

With a larger lens window and wider field of view, the CX-395 is built for speed. Whether you're transitioning targets, shooting on the move, or clearing corners, the generous sight picture makes it easier to find your dot and stay locked in under pressure.

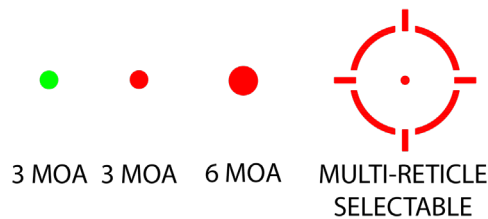

Multi-Reticle System. (MRS Models Only)

Choose from multiple reticle patterns to match your shooting style or mission need. Whether you're dialing in for precision or speed, the CX-395 adapts to your preference.

Tactile Adjustment Buttons

Easily find and adjust the intensity of your reticle with our straight forward button system. Rubberized with tactical feedback, the up and down are made for easy use when needed.

MODEL	CX-395g3	CX-395r3	CX-395r6	CX-395r3/28MRS
SELECTABLE RETICLE	NO	NO	NO	YES
RETICLE COLOR	GREEN	RED	RED	RED
RETICLE SIZE	3MOA	3MOA	6MOA	3/28 MRS
WINDOW SIZE	25 X 21 MM			
BATTERY	CR1632 SIDE LOAD			
FOOTPRINT	RMSc			
WEIGHT	28.5 g			
SHOCK RATING	1200 G			
WATER RATING	IPX7			
HOUSING	6061 aluminum alloy			
ADJUSTMENTS	Windage and elevation; 1.0 MOA per click			

Crisp, Distortion-Free Glass: The CX-395 delivers a clean, edge-to-edge image with multi-coated optics that enhance clarity and minimize glare—so your sight picture stays sharp in any light.

Precision Parallax Control: Engineered to maintain point-of-aim integrity across varied angles and shooting positions. Trust your dot—no matter how you're moving.
