

CX-695

Rugged and Ready

The CUDA CX-695 brings fully enclosed and rugged features to any handgun or long gun. With its ACRO mounting and included 3/4 inch riser, it is ready for picatinny or direct ACRO mounting. An optional MOS to ACRO adapter makes it an attractive add to any Glock.

Key Features and Innovations

Instant-On Motion Activation

The CX-695 is always ready to respond. Its built-in motion sensor activates the optic the moment movement is detected—no buttons, no delay. It automatically powers down to preserve battery, yet springs back to life instantly when you need it.

Fully enclosed

With a large enclosed emitter and top loading battery it makes for a perfect primary or secondary sight on any rifle. Included riser puts the sight at an ideal height when mounted to picatinny rail.

Multi-Reticle System. (MRS Models Only)

Choose from multiple reticle patterns to match your shooting style or mission need. Whether you're dialing in for precision or speed, the CX-695 adapts to your preference.

Tactile Adjustment Buttons

Easily find and adjust the intensity of your reticle with our straight forward button system. Rubberized with tactical feedback, the up and down are made for easy use when needed.
