

CX-595

Built for the Bigger Fight

The CUDA CX-595 brings full-frame muscle to the CUDA lineup. With an RMR footprint, larger lens window, and the same elite-grade reliability CUDA is known for, it's made for shooters who demand maximum visibility, faster sight picture, and rugged dependability in every condition.

Key Features and Innovations

Instant-On Motion Activation

The CX-595 is always ready to respond. Its built-in motion sensor activates the optic the moment movement is detected—no buttons, no delay. It automatically powers down to preserve battery, yet springs back to life instantly when you need it.

Expanded Viewing. Faster Acquisition.

With a larger lens window and wider field of view, the CX-595 is built for speed. Whether you're transitioning targets, shooting on the move, or clearing corners, the generous sight picture makes it easier to find your dot and stay locked in under pressure—perfect for high-tempo environments and especially well-suited for competitive shooting.

Multi-Reticle System. (MRS Models Only)

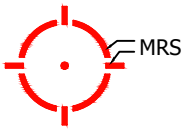

Choose from multiple reticle patterns to match your shooting style or mission need. Whether you're dialing in for precision or speed, the CX-595 adapts to your preference.

Backed by CUDA's Legacy of Reliability

Engineered with the same standard of durability that defines every CUDA optic, the CX-595 pairs precision craftsmanship with proven materials. From the range to serious use, it's CUDA tough—through and through.

Model Number:	CX-595r3/40MRS			CX-595r3
Reticle Selectable:	Yes			No
Reticle Color:	Red			Red
Reticle Size/Type:	3 MOA Dot	40 MOA Circle	54 MOA Cross	3 MOA Dot
Window Size:	28 x 22mm			
Power Supply:	One (1) CR2032, Top Loaded			
Dimensions:	50 mm (L) x 32mm (W) x 32mm (H)			
Weight:	51 g			
Shockproof Rating:	1500g			
Waterproof Rating:	IPX7 (submersed 1 meter for 30 minutes)			
Housing Material:	6061 aluminum alloy			
Adjustments:	Windage and elevation; 1.0 MOA per click			

RMR Mount

Crisp, Distortion-Free Glass: The CX-595 delivers a clean, edge-to-edge image with multi-coated optics that enhance clarity and minimize glare—so your sight picture stays sharp in any light.

Precision Parallax Control: Engineered to maintain point-of-aim integrity across varied angles and shooting positions. Trust your dot—no matter how you're moving.

Ruggedized for Real-World Use: Built to take a beating: shockproof to 1500Gs, waterproof to IPX7 for wet conditions.
